CONTENTS OF VOLUME 51

Number 1

PROFESSOR ARTHUR CHARLESBY MEMORIAL SEMINAR

Arne Miller	1	Foreword
Andrew Keller	3	Professor Arthur Charlesby personal reminiscences (recollections of my friend and scientific colleague)
Paul M. Cook and Robert M. Halperin	7	Arthur Charlesby—his impact on creating a new industry
Adolphe Chapiro	9	The contribution of Arthur Charlesby to the radiation chemistry of polymers—personal experience
R. Blackburn	11	Conversion of a radiochemist
Janusz M. Rosiak	13	GEL/SOL analysis of irradiated polymers
John Little	19	Arthur Charlesby—Philosophy and quantum theory
I. Boustead	23	Plastics and the environment

RADIATION PHYSICS

S. V. Anishchik, O. M. Usov, O. A. Anisimov and Yu. N. Molin	31	Study of a fraction of spin-correlated pairs in radiation spurs by the methods of time-resolved magnetic field effects and quantum beats
Richard A. Holroyd and T. K. Sham	37	Free ion yields for nonpolar liquids exposed to 1.6–3.5 keV X-rays
Ridvan Durak, Salih Erzeneoğlu, Yakup Kurucu and Yusuf Şahin	45	Measurement of photon-induced K X-ray production cross-sections for some elements with $40 \leq Z \leq 70$ at 122 keV
Chang Chen, Xingwang Fang, Jilan Wu and Yongke He	49	Radiolysis of glycyrrhizic acid monoamonium in N_2O saturated aqueous solution. A product and pulse radiolysis study

RADIATION CHEMISTRY

E. Janata	57	Instrumentation of kinetic spectroscopy-14
E. Janata and W. Gutsch	65	Instrumentation of kinetic spectroscopy-15
Isabel Platzer and Nikola Getoff	73	Vitamin C acts as radiation-protecting agent
Giancarlo Angelini, Roberto Bucci, Marcello Colosimo and Andrea Margonelli	77	Stability of methyl *p*-hydroxybenzoate (methylparaben) to gamma radiolysis
T. Goulet, M.-J. Fraser, Y. Frongillo and J.-P. Jay-Gerin	85	On the validity of the independent reaction times approximation for the description of the nonhomogeneous kinetics of liquid water radiolysis
K. Chabita, S. Basu, P. C. Mandal and S. N. Bhattacharyya	93	The protective role of Cu(II) ions in the photo degradation of uracil in aqueous solutions: a steady state and laser flash photolysis study

RADIATION PROCESSING

Larissa Alexandrova, Francisco Diaz, Miguel Canseco, Dmitri Likhatchev and Ricardo Vera-Graziano	101	Bulk polymerization of 1,3,5,7-tetravinyltetramethylcyclotetrasiloxane induced by gamma radiation

0969-806X/98/$ - see front matter © 1998 Elsevier Science Ltd. All rights reserved.

Hassan A. Al-Kahtani, Hamza M. Abu-Tarboush, Mohamed Atia, Adnan S. Bajaber, Mohamed A. Ahmed and Mohamed A. El-Mojaddidi — 107 Amino acid and protein changes in tilapia and Spanish mackerel after irradiation and storage

115 Book Review

Number 2

RADIATION PHYSICS

Shao Chun-Lin, Yao Jian-Ming, Wang Xiang-Qin and Yu Zeng-Liang — 117 N^+ ions irradiation-induced mass deposition in sodium carboxylic molecules

Ivan Michieli — 121 Point kernel calculation of dose fields from line sources using expanded polynomial form of buildup factor data: generalized secant integral-series representation

Jiancheng Zhang, Yihua Zhang, Yunfeng Yang, Yue Sen and Wenhai Wu — 129 Modification of surface properties of PbSe by ion implantation

RADIATION CHEMISTRY

Review Article
Guohong Zhang, Xinsheng Liu and J. Kerry Thomas — 135 Radiation induced physical and chemical processes in zeolite materials

R. Schaudy, J. Wendrinsky, R. J. Beer and J. Eberhardsteiner — 153 Fixation of three-dimensional states of deformation in polymers by ionizing radiation II. Basic fixation experiments

K. Wojciechowski — 159 The energy transfer processes in the xenon-hydrogen bromide mixture irradiated by xenon resonance light

G. R. Dey, D. B. Naik, K. Kishore, C. K. Vinayakumar, B. Yuvaraju, G. Venkateswaran and P. N. Moorthy — 171 Correlation between corrosion inhibition and radiation chemical properties of some organic corrosion inhibitors

RADIATION PROCESSING

Review article
Toru Hayashi, Olivia K. Kikuchi and Toshiyuki Dohino — 175 Electron beam disinfestation of cut flowers and their radiation tolerance

F. Szőcs — 181 Changes in ESR spectra of poly(methyl methacrylate) used in retrospective dosimetry of radiation accidents

Saveta Miljanić, Đuro Miljanić and Saša Blagus — 185 Response of the chlorobenzene-based dosimetry systems to protons in the energy range 3–5.5 MeV

M. Celina, H. Kudoh, T. J. Renk, K. T. Gillen and R. L. Clough — 191 Surface modification of polymeric materials by pulsed ion beam irradiation

I. Banik, Anil K. Bhowmick, V. K. Tikku, A. B. Majali and R. S. Deshpande — 195 Effects of electron beam on the structural modification of the co-polymeric and the terpolymeric fluorocarbon rubbers

M. Mateev and S. Karageorgiev — 205 The effect of electron beam irradiation and content of EVA upon the gel-forming processes in LDPE–EVA films

Z. Veksli, M. Andreis, S. Valić, T. Marinović and F. Ranogajec — 207 Different spatial heterogeneity of networks prepared by a two stage irradiation of natural rubber

H. B. Thorat, C. S. Prabhu, K. Sureshkumar and M. V. Pandya — 215 Stabilization of ethylene–propylene copolymer against γ-ray induced degradation

Number 3

RADIATION PHYSICS

G. Dattoli, A. Torre and **M. Carpanese** 221 The Hermite–Bessel functions: a new point of view on the theory of the generalized Bessel functions

V. Cobut, Y. Frongillo, J. P. Patau, T. Goulet, M.-J. Fraser and **J.-P. Jay-Gerin** 229 Monte Carlo simulation of fast electron and proton tracks in liquid water—I. Physical and physicochemical aspects

Y. Frongillo, T. Goulet, M.-J. Fraser, V. Cobut, J. P. Patau and **J.-P. Jay-Gerin** 245 Monte Carlo simulation of fast electron and proton tracks in liquid water—II. Nonhomogeneous chemistry

RADIATION CHEMISTRY

Review Article
D. W. Werst, P. Han and **A. D. Trifunac** 255 Radiation chemical studies in zeolites: radical cations and zeolite catalysis

Christiane Ferradini and **Jean-Paul Jay-Gerin** 263 Does multiple ionization intervene for the production of $HO_2^{\cdot}$ radicals in high-LET liquid water radiolysis?

W. Zheng, Y. Kobayashi, K. Hirata and **T. Suzuki** 269 Mobility of positrons in gamma-irradiated polypropylene and polyethylene

An Dong Liu, Ilya A. Shkrob, Myran C. Sauer and **Alexander D. Trifunac** 273 High mobility solvent holes in cycloalkane liquids studied by a two-color laser ionization

W. D. Geppert and **N. Getoff** 281 Radiolysis of 2-, 3- and 4-chlorobenzonitrile in aqueous solution and product analysis

Ivana A. Janković, Ljubica R. Josimović and **Slobodan V. Jovanović** 293 Formation and reactivity of carboxyphenyl radicals in aqueous solution

RADIATION PROCESSING

Berrak Dulkan, Handan Tutluer, Hatice Ayhan FiDanci and **Mustafa Polat** 305 ESR spectroscopic technique of testing for irradiation of chicken

S. Sabharwal, T. N. Das, C. V. Chaudhari, Y. K. Bhardwaj and **A. B. Majali** 309 Mechanism of N-butyl acrylate sensitization action in radiation vulcanization of natural rubber latex

Atef A. Abdel-Fattah and **M. El-Kelany** 317 Radiation-sensitive indicator based on radiation-chemical formation of acids in polyvinyl butyral films containing chloral hydrate

Numbers 4–6

7TH INTERNATIONAL SYMPOSIUM ON RADIATION PHYSICS—ISRP7

David A. Bradley and **Bikash Sinha** xiii Preface

Fundamental Processes in Radiation Physics

Invited Papers
Otto Reifenschweiler 327 Solid state environment effects on radioactivity

W. Drube	335	High resolution studies of deep core level threshold Auger processes
A. Ljubičić	341	Nuclear excitation in atomic processes
Contributed Papers		
K. L. Allawadhi, S. K. Arora, N. Singh and **S. L. Phutela**	347	Effect of Coster-Kronig transitions and incident photon energy on the L subshell X-ray intensity ratios of 4f transition elements
D. Mitra, M. Sarkar, D. Bhattacharya, P. Sen and **G. Kuri**	349	Anisotropic emission of the M X-rays of Au bombarded with carbon ions
K. Singh and **Vijay Kumar**	351	Measurements of K-electron capture probabilities to 316 379 and 472 keV levels of ^{169}Tm
H. R. Verma	353	Observation of K hypersatellites in Ca, Ti, Fe, Zn and Ge by photon bombardment
L. A. LaJohn and **R. H. Pratt**	355	Beyond dipole effects in atomic processes
Raj Mittal and **Vandana**	357	Alignment parameter of photon induced L_3 vacancies in elements $56 \leq Z \leq 92$
V. R. K. Murty, D. P. Winkoun and **K. R. S. Devan**	361	Total photoelectric cross sections close to absorption edges
S. J. Anasuya, T. K. Umesh and **Ramakrishna Gowda**	363	Photoeffect cross sections of some rare earth elements for 661.6 keV gamma rays by a new method
Ibrahim S. Elyaseery, A. Shukri, C. S. Chong, A. A. Tajuddin and **D. A. Bradley**	365	Measurement of forward scattering of 59.5 keV gamma rays by low to high Z elements
B. K. Chatterjee, Mala Das and **S. C. Roy**	369	Tabulations of elastic scattering cross sections of all elements $13 \leq Z \leq 100$ in the energy range 50 keV to above 1000 keV
J. P. J. Carney, Lynn Kissel, R. H. Pratt, S. C. Roy and **S. K. Sen Gupta**	371	Elastic photon scattering from excited states of atoms and ions
T. K. Umesh, Sandiago and **Ramakrishna Gowda**	373	Anomalous scattering factors of Zr and Sn derived using photon interaction cross sections
K. Siddappa, N. Govinda Nayak, Gerald Pinto and **K. M. Balakrishna**	375	Incoherent scattering of 59.5 keV γ-rays at 3.385Å^{-1} photon momentum transfer
Jagjit Kaur, R. Dewan, Bhajan Singh, B. S. Sandhu and **B. S. Ghumman**	377	Investigations of spectral distribution of Compton scattered gamma rays from K-shell electrons of tin using 662 keV photons
W. C. Toye and **P. N. Johnston**	379	An experimental test of recent S-matrix calculations of the doubly differential Compton cross-section for Ta K electrons
K. K. Sud and **C. Selvaraju**	381	DWBA pair production calculation for intermediate energy photons
J. E. Fernández	383	Non-linear photon transport due to polarization effects
V. G. Molinari and **J. E. Fernández**	387	Slowing down and range of a beam of particles
R. Dewan, Jagjit Kaur, B. S. Sandhu, B. Singh and **B. S. Ghumman**	389	Investigations of angular distributions of collision products in double photon Compton scattering
A. R. Lakshmanan, U. Madhusoodanan, B. S. K. Nair and **D. Sundar**	391	Photoluminescent excitation and emission spectra of rare earth doped $CaSO_4$ thermostimulated luminescent phosphors
A. R. Lakshmanan	395	Thermostimulated emission process in $CaSO_4$:Mn
A. R. Lakshmanan, U. Madhusoodanan, D. Sundar and **B. S. K. Nair**	399	A critique on the Ce to Mn energy transfer and sensitization of thermostimulated luminescence in $CaSO_4$:Ce,Mn

M. Sohrabi, M. Jafarizadeh and **M. Zahedifar**	401	Kinetic parameters of LiF:Mg,Ti thermoluminescent dosimeters
Himansu Kumar Kundu	403	On the origin of the two components in the decay times of lyoluminescent alkali halides
Tomás S. Plivelic, Miguel A. Chesta and **Raúl T. Mainardi**	405	Characteristic radiation induced by energetic electrons and positrons incident on metallic targets
Claudia M. Sanchez, Edgardo V. Bonzi and **Raúl T. Mainardi**	407	Influence of cross section data bases on electron transport coefficients in gases
B. Oujidi, R. Sanchez and **L. Erradi**	409	Solution of the neutron transport equation by the collision probability method in three dimensional domains
Jasbir S. Braich, Punita Verma and **H. R. Verma**	411	Spectator vacancies in Pt caused by 64 to 88 MeV S-ion impact

Radiation Sources and Detectors

Invited Papers

J. Jolie, Th. Materna and **W. Mondelaers**	413	On the construction of a tunable high-energy photon source
Y. P. Viyogi	423	Detectors for high energy nuclear physics experiments
Yu. M. Tsipenyuk	429	Poly-capillary X-ray and neutron optics (Kumakhov optics)

Contributed Papers

M. Krčmar, Z. Krečak, A. Ljubičić and **B. A. Logan**	437	Efficiency of the channel electron multiplier for low energy Ag ions
Z. Krečak, M. Krčmar, A. Ljubičić and **B. A. Logan**	439	Method for decomposition of particle energy spectrum detected by channel electron multiplier device
K. Siddappa, Ganesh, K. M. Balakrishna, S. S. Ramamurthi, H. C. Soni, P. Shrivastava, Y. Sheth and **R. Hemnani**	441	Variable energy microtron for R & D work
Tomás S. Plivelic, Pedro A. Derosa, Silvina Bengio and **Raúl T. Mainardi**	443	Statistical pulse height distribution width reduction by suitable selection of amplitudes
P. Harisha, A. R. Nayak and **S. K. Mehta**	445	Estimation of bremsstrahlung dose rate from a low energy electron accelerator
Pedro A. Derosa and **Raúl T. Mainardi**	447	X-ray polarization efficiencies of flat and cylindrical surfaces
M. I. Lopes, V. Chepel, R. Ferreira Marques and **A. J. P. L. Policarpo**	449	A study of the performance of microstructures in liquid xenon
P. S. Rao, A. K. Mahant, Suresh Rao, S. M. Tripathi and **S. C. Misra**	453	Some studies on cobalt and vanadium self powered neutron detectors developed by ECIL
C. C. Dey and **B. K. Sinha**	455	Novel method of using BaF_2 scintillators to increase counting efficiency in angular correlation experiments
Dipa Bandyopadhyay and **Swapan Kumar Basu**	457	CsI(Tl)-PIN detector as an element of a charged particle multiplicity filter array
V. R. K. Murty, D. P. Winkoun and **K. R. S. Devan**	459	On the comparison of performance of freolectric cooled Si(Li) and Si-PIN Peltier cooled detectors
K. M. Varier and **K. Karunakaran Nair**	461	Possible effect of source backing on the backscatter peak in gamma spectra

Deepak Gopalani, S. Kumar, P. Ramaseshu, V. K. Sundaram and **S. K. Mehta**	463	Study of degraded neutron spectra through metal matrix composites using CR-39 films
Vivek Mandot and **S. S. Sharma**	465	Time differential perturbed angular correlation measurement (TDPAC) using fast tubes XP2020Q coupled with BaF_2 scintillators
Sajo L. Bohus, J. Palfalvi and **E. D. Greaves**	467	Hot particle spectrum determination by track image analysis
M. Sohrabi, N. Dadvand and **M. R. Kardan**	469	Introduction of PMW and PEMW etchants for rapid and broad-energy range alpha track registration in ECE polycarbonate detectors
Juan Azorín Nieto	471	Thermoluminescence and optical characteristics of europium-doped barium sulphate
B. Roy, B. K. Chatterjee, M. Das and **S. C. Roy**	473	Study of nucleating efficiency of superheated droplets by neutrons
J. Pal, S. Saha, C. C. Dey, B. K. Sinha and **M. B. Chatterjee**	475	Neutron energy spectrum of an Am–Be source by gamma gated NTOF technique
Y. M. Amin, R. H. Mahat, D. Donald, P. Shankar and **C. S. Wong**	479	Measurement of X-ray Exposure From a Flash X-ray Tube Using TLD 100 and TLD 200

Applications of Radiation in Fundamental Research

Invited Papers

Seppo Manninen	481	Synchrotron-based Compton scattering studies
M. K. Sanyal	477	X-ray scattering studies of surfaces and interfaces
A. Chakrabarti	497	Radioactive ion beams—global scenario and national efforts
Yu. M. Tsipenyuk, A. S. Barabash, V. N. Kornoukhov and **B. A. Chapyzhnikov**	507	Experimental test of the possible violation of the Pauli exclusion principle by photo-activation analysis of carbon content in pure boron

Contributed Papers

Harish Bahadur	513	A brief survey of aluminum and alkali-related hydroxyl defects in quartz crystals and their radiation effects
Sharad T. Chavan and **Vasant N. Bhoraskar**	515	Studies on damage induced by 45 and 80 MeV boron ions in crystalline silicon
Aniruddha Deb, S. K. Saha, R. Guin and **A. K. Chatterjee**	517	Compton scattering studies on niobium carbide and vanadium carbide
K. B. Joshi, Rajesh Jain, R. K. Pandya, B. L. Ahuja and **B. K. Sharma**	519	Compton profile study of beryllium oxide
B. K. Sharma, K. B. Joshi, B. L. Ahuja, R. K. Pandya and **R. Jain**	521	Anisotropy of the momentum density in $Nb_{50}Mo_{50}$ alloy
L. Paramesh and **P. Venkataramaiah**	523	A study of multiple scattering of 835 keV photons from thick samples of Al, Fe, Cu, Sn and Pb
G. Albertini, G. Caglioti, M. Ceretti, F. Fiori, F. Oggioni, F. Rustichelli and **L. Viviani**	525	Neutron diffraction measurements of residual stresses in a thermoelastically coupled AA6082 alloy system
C. M. Sunta, W. E. F Ayta, J. F. D. Chubaci and **S. Watanabe**	527	Importance of quasi-equilibrium in thermally stimulated luminescence and conductivity

L. Z. Gamarra, M. Matsuoka, S. Watanabe, T. Nakajima and **C. M. Sunta**	529	Thermoluminescence and paramagnetic centers created by radiation in quartz
Noélio Oliveira Dantas, José Fernando Diniz Chubaci and **Shigueo Watanabe**	531	Optical absorption bands and thermoluminescence peaks in heavily irradiated fluorites.
C. M. Sunta, W. E. F. Ayta and **S. Watanabe**	533	Thermally stimulated luminescence and conductivity—A critical review of the theoretical treatments and their applicability to experimental results
Gilberto M. Ferraz, Masao Matsuoka, C. M. Sunta and **S. Watanabe**	535	Radiation effects on optical properties of pure and doped BaF_2 crystals
Tapas Mukherjee, Subir K. Das, Bichitra Nandi-Ganguly, Prasanta Sen and **Binayak Dutta-Roy**	537	Radiation effects associated with reverse micellar systems in apolar solvent
Sankar Dhar, Tapobrata Som, Harish C. Verma and **Vishwas N. Kulkarni**	539	MeV ion beam mixing of Au in $Fe_{78}B_{13}Si_9$ amorphous metallic alloy
J. K. Basu, M. K. Sanyal and **A. Datta**	541	X-ray reflectivity study of thin organic films
S. A. Holt, D. C. Creagh and **W. D. Hutchison**	543	X-ray reflectivity studies of mono- and bi-layers of manganese stearate on silicon substrates

Radiation in Biophysics, Medicine and the Environment

Invited Papers

G. V. Iyengar	545	Reevaluation of the trace element content in Reference Man
S. Green	561	Developments in accelerator based boron neutron capture therapy
D. T. L. Jones and **S. J. Mills**	571	The South African National Accelerator Centre: particle therapy and isotope production programmes
Carlyle J. Roberts	579	Management and disposal of waste from sites contaminated by radioactivity

Contributed Papers

M. C. Cantone, D. de Bartolo, A. Giussani, P. Roth and **E. Werner**	589	The stable isotope approach to elemental biokinetics
Seng-Huat Ong, Kwan-Hoong Ng and **D. A. Bradley**	591	On statistical methods for handling data with determination limits in radioanalytical research
M. S. Jahan, D. E. Thomas, K. Banerjee, H. H. Trieu, W. O. Haggard and **J. E. Parr**	593	Effects of radiation-sterilization on medical implants
C. R. Baker, F. Prietzel, Y. Pantos, J. Tandy, C. S. Jennings and **J. A. Mills**	595	Experimental and Monte-Carlo investigations of electron scattering foil systems for a clinical betatron
M. C. Cantone, L. Cattaneo, D. de Bartolo, A. Giussani and **B. Candoni**	597	Low energy ^3He induced reaction for radiotherapy purposes
D. Ponraju, K. V. Subbaiah, A. Kadiresan, S. Viswanathan and **Letha Sebastian**	599	Evaluation of neutron dose to patients undergoing high energy X-ray and electron radiotherapy using a bubble detector
J. V. Siebers and **D. Mukhopadhyay**	601	Modelling production of β_1+ emitting isotopes by proton therapy beams using the LAHET Code System

Donald McLean	603	K-characteristic photon absorption in medical diagnostic X-ray imaging receptors: calculation of contrast and resolution effects
O. D. Gonçalves, J. Eichler, H. Schechter, H. J. Schultz and **S. D. Magalhães**	605	Measurement of secondary to primary ratio of 60 keV photons in water phantoms
M. J. Farquharson and **R. D. Speller**	607	Trabecular bone mineral density measurements using energy dispersive X-ray diffraction (EDXRD)
R. H. Mahat, Y. M. Amin, P. Mathiyalagan and **S. Rajan**	609	Diurnal variation of indoor radon concentration in Malaysia
Nishith Kumar Das, Debasis Ghose and **Bikash Sinha**	611	Radon emission from hydrothermal springs at Tantloi
Debasis Ghose, Debasish Paul and **R. C. Sastri**	613	Radon geochemical anomaly at Bakreswar thermal springs
A. Mamoon, W. H. Abulfaraj, S. M. Kamal and **M. A. Sohsah**	615	Decontamination leaching of Ra-226 contaminated gravel as monitored by liquid scintillation counting and thermoluminescent dosimetry
B. N. Anandaram, S. Manjunatha, L. Paramesh and **P. Venkataramaiah**	617	Study of environmental radioactivity in and around Shimoga, Karnataka, India—a preliminary report
S. Manjunatha, B. N. Anandaram, L. Paramesh and **P. Veankataramaiah**	619	Study of environmental radioactivity at the horizon of uranium bearing quartz pebble conglomerates near Chickmagalur, India
N. Ibrahim	621	Determination of natural radioactivity in fertilizers by gamma ray spectroscopy
N. Karunakara, H. M. Somashekarappa, Y. Narayana, D. N. Avadhani, H. M. Mahesh, K. M. Balakrishna and **K. Siddappa**	623	Caesium-137 concentration in Kaiga environment
H. K. Bandhu, Sanjiv Puri, M. L. Garg, J. S. Shahi, D. Mehta, D. K. Dhawan, Nirmal Singh, P. C. Mangal and **P. N. Trehan**	625	Monitoring of urban air pollution using EDXRF technique
L. Musilek, T. Čechák, D. Baimolda, H. Th. Wolterbeek and **T. Verburg**	627	XRFA in monitoring impact of coal burning
N. O. Hashim, A. M. Kinyua, M. J. Mangala and **I. V. S. Rathore**	629	EDXRF analysis of lead and other toxic trace elements in soil samples along two major highways of Kenya

Radiation in Technology

Invited Papers

H. Bakhru, Atul Kumar and **Arthur Haberl**	631	Industrial applications of high energy microbeams
C. H. de Novion	637	Recent advances of neutron scattering in materials science and technology
R. K. Bhandari	645	Accelerators for nuclear energy applications
David J. Nagel	653	The status of 'cold fusion'

Contributed Papers

G. L. Baheti, N. Saxena, P. K. Khatri, L. R. Meghwal, K. C. Songara and **V. L. Meena**	669	Material identification using gamma ray scattering: a novel approach

Harjot Gill, Gagandeep Kaur, Kulwant Singh, Vijay Kumar and J. Singh 671 Study of effective atomic numbers in some glasses and rocks

R. A. Barrea, P. A. Derosa, S. Bengió and R. T. Mainardi 673 Thin sample thickness determination by X-ray fluorescence analysis

O. D. Gonçalves, F. L. Custódio and J. Eichler 675 Material analysis based on fluorescence induced by gamma-rays

B. Rout, S. K. Ghose, B. Sundaravel, G. Kuri, D. P. Mahapatra, B. N. Dev, P. Sen, H. Bakhru and A. W. Haberl 677 Micro ion-beam facility at the Institute of Physics, Bhubaneswar

A. Das, N. Sivakumar, M. Joseph, S. Dhara and A. Patnaik 679 Effect of energetic charged particles on laser ablated thin film of poly(phenylene sulfide)

B. Yang, O. Francescangeli, F. Rustichelli, E. L. Tassi, M. Paci and P. L. Magagnini 681 Structural study of poly(1,3-propylene adipate)s with cyanoazobenzene side-groups by X-ray diffraction

T. Som, S. Dhar and V. N. Kulkarni 683 Study of low energy plasma ion implanted hydrogen in GaAs

K. Ueki and A. Ohashi 685 Evaluation of neutron shielding enhancement effect due to structural material

A. Ohashi and K. Ueki 687 Improvement of a ^{90}Sr radioisotope battery

Radiation in Archeometry, Earth and Space Sciences, and Cosmology

Invited Papers

G. E. Gigante and R. Cesareo 689 Non-destructive analysis of ancient metal alloys by in situ EDXRF transportable equipment

S. M. Chitre 701 Solar photons, phonons and neutrinos

Carlos O. Escobar 705 The Pierre Auger cosmic ray observatory

Contributed Papers

R. H. Mahat, Y. M. Amin, Z. Jaafar, R. Prakash and B. Vengadaesvaran 713 Thermoluminescence dating of Gua Tok Long prehistoric site in Malaysia

Vojtěch Dynybyl, Josef Gerndt, Jan Kanaval, Martin Kubelik, Ladislav Musilek, Milan Pavlk and Jiří Zýma 715 Thermoluminescence reader for dating of brick structures

N. Orlić, J. Dobrinić and P. R. Salvi 717 Elemental analysis of archaeological objects by X-ray emission spectroscopy

S. H. Tatumi, T. Nagatomo, D. Sengupta, S. Watanabe, A. M. F. Barreto and K. Suguio 719 Thermoluminescence studies on quartz grains from eolian sediments in Brazil

Osama Fageeha and R. C. Block 721 3-D simulation of 5 MeV alpha particles inside Si diodes utilizing a modified delta-ray model

CONTENTS OF VOLUME 52

Numbers 1–6

PROCEEDINGS OF THE 10TH INTERNATIONAL MEETING ON RADIATION PROCESSING

James F. Clouser — 1 — Preface

James F. Clouser, John Barker and Arne Miller — 5 — Editors' Remarks

RADIATION STERILIZATION

Yan Aoshuang — 7 — Contamination sources of pyronema domesticum on Chinese cotton-based medical products

Byron J. Lambert and Joyce M. Hansen — 11 — ISO radiation sterilization standards

Fátima Nogueira, M. Luisa Botelho and Rogério Tenreiro — 15 — Radioresistance studies in: *Methylobacterium* spp.

M. Takehisa, H. Shintani, M. Sekiguchi, T. Koshikawa, T. Oonishi, M. Tsuge, K. Sou, Y. Yamase, S. Kinashita, H. Tsukamoto, T. Endo, K. Yashima, M. Nagai, K. Ishigaki, Y. Sato and J. L. Whitby — 21 — The radiation resistance of the bioburden from medical devices

James L. Whitby — 29 — Comments on the Japanese study of the radiation resistance of the bioburden of medical devices

FOOD IRRADIATION—GENERAL

Cai Jianming — 35 — Preservation of fresh noodles by irradiation

Henry Delincée and Beatrice-Louise Pool-Zobel — 39 — Genotoxic properties of 2-dodecylcyclobutanone, a compound formed on irradiation of food containing fat

Henry Delincée, Anna-Lucia C. H. Villavicencio and Jorge Mancini-Filho — 43 — Protein quality of irradiated Brazilian beans

Ding Lianzhong, Ding Shiyue, Zhu Yan, Li Yixu and Zhu Songmei — 49 — A study on chemical composition of spices irradiated by electron beam

Xingwang Fang and Jilan Wu — 53 — Feasibility of sterilizing traditional Chinese medicines by gamma-irradiation

Lúcia F. S. Ferreira and Nélida L. del Mastro — 59 — Rheological changes in irradiated chicken eggs

John A. Fox and Dennis G. Olson — 63 — Market trials of irradiated chicken

Masukazu Furuta, Toshio Hayashi, Yasushi Hosokawa, Tomohisa Kakefu and Hideaki Nishihara — 67 — Consumer attitudes to radiation and irradiated potatoes at "Radiation Fair" in Osaka, Japan

Toru Hayashi, Yoko Takahashi and Setsuko Todoriki — 73 — Sterilization of foods with low-energy electrons ("soft-electrons")

A. Mahrour, M. Lacroix, J. Nketsa-Tabiri, N. Calderon and M. Gagnon — 77 — Antioxidant properties of natural substances in irradiated fresh poultry

A. Mahrour, M. Lacroix, J. Nketsa-Tabiri, N. Calderon and M. Gagnon	81	Antimicrobial properties of natural substances in irradiated fresh poultry
Michelle Marcotte	85	Irradiation as a disinfestation method—update on methyl bromide phase out, regulatory action and emerging opportunities
W. Migdal, B. Owczarczyk, B. Kedzia, E. Holderna-Kedzia and E. Segiet-Kujawa	91	The effect of ionizing radiation on microbiological decontamination of medical herbs and biologically active compounds
Myung-Woo Byun, Hong-Sun Yook, Il-Jun Kang, Cha-Kwon Chung, Joong-Ho Kwon and Kang-Ju Choi	95	Comparative effects of gamma irradiation and ozone treatment on hygienic quality of Korean red ginseng powder
Josephine Nketsia-Tabiri	101	Optimization of radiation treatment of ginger (*zingiber officinale*) rhizomes using response surface methodology
H. Oufedjikh, M. Mahrouz, M. Lacroix, M. J. Amiot and M. Taccini	107	The influence of gamma irradiation on flavonoïds content during storage of irradiated clementina
M. B. Perez, O. A. Curzio, M. I. Aveldaño and C. A. Croci	113	Effects of γ-irradiation on the lipid composition of inner sprout of garlic
Shengchu Qi, Shaohua Yuan, Jilan Wu and Xingwang Fang	119	Pork fat peroxidation by gamma-irradiation
M. J. Trigo and M. J. Fraqueza	125	Effect of gamma radiation on microbial population of natural casings
Christine M. Bruhn	129	Consumer acceptance of irradiated food: theory and reality

FOOD IRRADIATION—DETECTION OF IRRADIATED FOODS

Henry Delincée	135	Detection of irradiated food: DNA fragmentation in grapefruits
Hasan M. Khan and Henry Delincée	141	Detection of irradiation treatment of foods using DNA 'comet assay'
Hasan M. Khan, Ijaz A. Bhatti and Henry Delincée	145	Identification of irradiated pulses by thermoluminescence of the contaminating minerals
J. H. Kwon, H. W. Chung, M. W. Byun and I. J. Kang	151	Thermoluminescence detection of Korean traditional foods exposed to gamma and electron-beam irradiation
W. Stachowicz, G. Burlinska and J. Michalik	157	EPR detection of foods preserved with ionizing radiation
A. L. C. H. Villavicencio, J. Mancini-Filho and H. Delincée	161	Application of different techniques to identify the effects of irradiation on Brazilian beans after six months storage
S. Zhu, C. Fu, W. Jiang, D. Yao, K. Zhao and Y. Zhang	167	Radiation sterilization and identification of gizzard slices

POLYMERS, GENERAL

E. Adem, M. Alvaios-Borja, D. Carrillo, M. Vazquez, E. Sanchez, M. P. Carreon and G. Burillo	171	Crosslinking of recycled polyethylene by gamma and electron beam irradiation
N. A. Andreucetti, C. Sarmoria, O. A. Curzio and E. M. Valles	177	Effect of the phenolic antioxidants on the structure of gamma-irradiated model polyethylene

Zhai Maolin, Yi Min, Shu Jian, Wei Jinshan and **Ha Hongfei**	313	Radiation preparation and diffusion behavior of thermally reversible hydrogels
A. B. Lugão, L. D. B. Machado, L. F. Miranda, M. R. Alvarez and **J. M. Rosiak**	319	Study of wound dressing structure and hydration/dehydration properties
Li Fengmei and **Chen Dianhua**	323	Effect of radiation on structure and properties of material made from ox-pericardium

ENVIRONMENT PROTECTION

M. G. Bettoli, M. Ravanelli, L. Tositti, O. Tubertini, L. Guzzi, W. Martinotti, G. Queirazza and **M. Tamba**	327	Radiation induced decomposition of halogenated organic compounds in water
S. I. Borrely, N. L. del Mastro and **M. H. O. Sampa**	333	Improvement of municipal wastewaters by electon beam accelerator in Brazil
A. G. Chmielewski, B. Tymiński, A. Dobrowolski, S. Sato, O. Tokunaga and **S. Machi**	339	Influence of gas flow patterns on No_x removal efficiency
P. Gehringer and **H. Fiedler**	345	Design of a combined ozone/electron beam process for waste water and economic feasibility of the process
J. Licki, A. G. Chmielewski, E. Iller, G. Zakrzewska-Trznadel, O. Tokunaga and **S. Hashimoto**	351	Analytical methods and monitoring system for E-beam flue gas treatment process
H.-R. Paur, W. Baumann, H. Mätzing and **K. Jay**	355	Electron beam induced decomposition of chlorinated aromatic compounds in waste incinerator offgas
E. A. Podzorova, A. K. Pikaev, V. A. Belyshev and **S. L. Lysenko**	361	New data on electron-beam treatment of municipal wastewater in the aerosol flow
M. H. O. Sampa, C. L. Duarte, P. R. Rela, E. S. R. Somessari, C. G. Silveira and **A. L. Azevedo**	365	Remotion of organic compounds of actual industrial effluents by electron beam irradiation
D. Schmelling, D. Poster, M. Chaychian, P. Neta, W. McLaughlin, J. Silverman and **M. Al-Sheikhly**	371	Applications of ionizing radiation to the remediation of materials contaminated with heavy metals and polychlorinated biphenyls
C. M. Gbedemah, M. Obadai and **L. C. Sawyerr**	379	Preliminary investigations into the bioconversion of gamma irradiated agricultural waste by *Pleurotus* spp.

RADIATION CHEMISTRY

H. Bao, S. Yao, Z. Zuo, J. Zhang and **N. Lin**	383	Pulse radiolysis studies of 4,7-phenanthroline-(II)
P. Kujawa, P. Ulański and **J. M. Rosiak**	389	Time-resolved investigations of pulse-initiated polymerization
A. Negron-Mendoza and **S. Ramos-Bernal**	395	Radiolysis of carboxylic acids adsorbed in clay minerals

C. Chijate, G. Albarran and A. Negron-Mendoza — 401 Radiolysis of aqueous solutions of thiamine

Fengmei Li and Xingwang Fang — 405 Pulse radiolysis of epicatechin in aqueous solution

IRRADIATION FACILITIES—GAMMA

James F. Clouser and Eric W. Beers — 409 The minicell™ irradiator: a new system for a new market

David Coppell — 413 The significance of water chemistry in wet plant operation

John T. Corley — 419 Cobalt 60 gamma irradiation current status, trends and insights

D. K. Kopeliovich, Y. A. Malykh, S. G. Gladyshev, V. I. Lelikov and A. I. Chikshov — 425 New design of Co-60 source for wet gamma irradiators

O. Reuter, R. Langley and Wan Manshol Bin W. Zin — 429 The design of an irradiator for the continuous processing of liquid latex

M. Comben and P. Stephens — 433 The operational benefits of integrated PC control of gamma irradiation plants

Wang Binglin, Ma Shiming, Chian Jian, Zong Huiqi and Tang Quanyong — 439 The practice for eight-year operation of the cobalt-60 irradiation facility at Beijing radiation application research center

R. Langely and G. Reuter — 443 Innovations—potential applications for an irrradiator for pumpable liquids

A. Kovacs, A. Moussa, I. Othman, C. del Valle Odar, A. Seminario, M. Linares, P. Huamanlazo, J. Aymar and R. Chu — 447 Improvement of plant parameters of the ROBO gamma irradiation facility due to design modification

Valentin Shevchenko — 453 Possibilities of Co-60 production at Leningrad NPP reactors

IRRADIATION FACILITIES—ELECTRON

V. L. Auslender, A. A. Bryazgin, L. A. Voronin, V. A. Polyakov, V. P. Grodetskiy, I. K. Izhboldin, O. M. Mirsaetov, A. M. Petrov, Yu. T. Obidin and V. N. Ponomaryov — 459 Automated technological radiation installation for sterilization of medical goods

A. Tata, F. Casali and M. Schwarz — 465 A new irradiation plant in Italy: technical features and activities performed

Y. Kamino — 469 10MeV 25KW industrial electron LINAC

K. Mizusawa, M. Kashiwagi and Y. Hoshi — 475 5MeV electron beam facilities in Japan

Sam V. Nablo, James C. Wood Jr, Marc F. Desrosiers and Vitaly Yu. Nagy — 479 A fluidized bed process for electron sterilization of powders

Marlin N. Schuetz and David A. Vroom — 487 A robust industrial accelerator window design

James L. Hackett — 491 A state of the art electron beam sterilization facility

Tang Qiang, Zhou Yong, Zhou Youyi and Bao Huaying — 495 The automatic interlocking system of electron absorbed dose monitoring and irradiation process control

IRRADIATION FACILITIES—GENERAL

M. A. Smith — 499 Radiation safety training for industrial irradiators: what are we trying to accomplish?

T. M. Stepanik, S. Rajagopal, D. Ewing and R. Whitehouse	505	Electron-processing technology: a promising application for the viscose industry
A. I. Chikshov, Y. V. Glagolenko, Y. A. Malykh, Roger Langley and Ian Latham	511	Mayak production association "The fifty year old secret"
N. Bennett, R. Langley and G. Reuter	515	The environmental impact of irradiation plants
James O'Doherty	519	Implementing an environmental management system in a irradiation facility

DOSIMETRY AND PROCESS CONTROL

Barry Fairand	523	Calibration of a polymethylmethacrylate routine dosimetry system
Gao Juncheng	527	Ten years implementation of NDAS program in China
Arne Miller	533	Dosimetry requirements derived from the sterilization standards
A. Kovács, L. Wojnárovits, C. Kurucz, M. Al-Sheikhly and W. L. McLaughlin	539	Large-scale dosimetry using dilute methylene blue dye in aqueous solution
C. B. Lawrence, J. McKeown and E. B. Svendsen	543	Real-time confirmation of electron-beam dose
S. Onori, E. Bortolin, M. Lavalle and P. G. Fuochi	549	$CaSO_4$:Dy phospor as a suitable material for EPR high dose assessment
A. K. Pikaev and Z. K. Kriminskaya	555	Use of tetrazolium salts in dosimetry of ionizing radiation
G. Piña-Villalpando and D. P. Sloan	563	Dose distribution studies of a gamma industrial irradiator using a PC code
I. Polónia, L. Portugal and M. E. Andrade	569	Dose mapping of dried figs treated by gamma radiation
Z. P. Zagórski	575	Role of the matrix in the alanine-powder dosimetry
M. R. Sené, M. Bailey and D. J. S. Findlay	579	Plant and dosimeter stability at a 10MeV electron beam plant
A. Kovacs, A. Moussa, I. Othman and K. Alnaal	585	Dosimetry commissioning of the gamma irradiation facility "ROBO"

INTERNATIONAL STATUS AND DEVELOPMENT

Sueo Machi	591	Prospects for the application of radiation processing and the activities of the IAEA
Ichiro Katsura	599	Current status and future prospect of electron beam sterilization in Japan
A. B. Lugão, L. G. Andrade E Silva	603	Status and future trends of radiation processing in Brazil

CURRENT ISSUES OF RADIATION PROCESSING

Z. P. Zagórski	607	Radiation processing and market economy
Wan Manshol Bin W. Zin	611	Semi industrial scale RVNRL preparation, products manufacturing and properties
Peter Kunstadt	617	Radiation disinfestation of wood products
J. Woolston	625	Current safety topics under consideration by the 'gamma panel'
V. G. Shevchenko	629	Radiation processing development at Leningrad nuclear power plant

David M. Smith and Susan McCready-Shea 631 Regulating the operation of irradiation facilities in Great Britain: a goal setting approach

SPECIAL APPLICATIONS

S. Baccaro, B. Borgia, A. Cecilia, I. Dafinei, M. Diemoz, M. Nikl and M. Montecchi 635 Lead tungstate ($PbWO_4$) scintillators for LHC EM-calorimeter

B. Bartoníček, V. Hnát and V. Ptáček 639 Life-assessment technique for nuclear power plant cables

S. Ramos Bernal, E. Cruz, J. M. Hernandez and H. Murrieta 643 Room temperature F-coloring of lead doped NaCl as a function of radiation intensity and impurity concentration

O. K. Kikuchi, S. Todoriki and T. Hayashi 649 Sucrose delays membrane deterioration of chrysanthemum flowers induced by gamma-rays

S. Ramos Bernal, J. A. Hernandez and H. S. Murrieta 655 Dose rate dependence of the first stage coloration of NaCl samples doped with impurity concentration Sn

Yu. Solovetskii, D. Panteleev and V. Lunin 659 High-temperature electron irradiation and radiation-thermal technology for utilization, purification and production of some metals

N. Nascimento, P. J. Spencer, H. F. Andrade Jr, M. C. Guarnieri and J. R. Rogero 665 Effects of gamma radiation on snake venoms

CONTENTS OF VOLUME 53

Number 1

RADIATION PHYSICS

Michael Dingfelder, Detlev Hantke, Mitio Inokuti and **Herwig G. Paretzke** — 1 Electron inelastic-scattering cross sections in liquid water

R. A. Jones — 19 A note on H-atom transfer and alkyl radical migration in polyethylene crystallites: MNDO saddle-point energies in a model n-heptane crystal

Tadashi Hisamatsu, Osamu Kawasaki, Sumio Matsuda and **Kazuyoshi Tsukamoto** — 25 Photoluminescence study of silicon solar cells irradiated with large fluence electrons or protons

RADIATION CHEMISTRY

Mikio Nakashima and **Chiaki Sagawa** — 39 Ion-beam-induced reduction of iron oxide supported on porous glass

K. Wojciechowski — 45 The mechanism and kinetics of energy transfer processes in the $Xe–CCl_4–M$ ($M = CH_4$, C_2H_2, C_2H_4, C_2H_6, C_3H_6 and C_3H_8) mixtures irradiated by xenon resonance light

K. Wojciechowski — 47 The mechanism and kinetics of energy transfer processes in $Xe–CCl_4–M$ ($M = CO$, CO_2) mixtures irradiated by xenon resonance light

RADIATION PROCESSING

J. Mckeown, L. Armstrong, M. R. Cleland, N. H. Drewell, J. Dubeau, C. B. Lawrence and **D. Smyth** — 55 Photon energy limits for food irradiation: a feasibility study

Papiya Sen Majumder and **Anil K. Bhowmick** — 63 Surface- and bulk-properties of EPDM rubber modified by electron beam irradiation

Elmo S. Araújo, Helen J. Khoury and **Sueldo V. Silveira** — 79 Effects of gamma-irradiation on some properties of durolon polycarbonate

H. H. Mai, H. Tachibana and **T. Kojima** — 85 Effects of temperature during irradiation and spectrophotometry analysis on the dose response of aqueous dichromate dosimeters

Number 2

RADIATION PHYSICS

R. Idoeta and **F. Legarda** — 93 Study of beta-ray backscattering saturation thickness with two different approximations to the linear transport theory

D. Sinha and **K. K. Dwivedi** — 99 Modifications of radiation detection response of PADC track detectors by photons

S.-C. Hsu, C.-Y. Wu and **N.-R. Ou** — 107 Azimuthally dependent radiative transfer in a non-homogeneous cylindrical medium

T. Kojima, H. Sunaga, H. Takizawa, H. Tachibana and **R. Tanaka** — 115 Fluence measurements applied to 5–20 MeV/amu ion beam dosimetry by simultaneous use of a total-absorption calorimeter and a Faraday cup

Kulwant Singh, Gagandeep Kaur, V. Kumar, A. K. Dhami and B. S. Lark — 123 Measurement of attenuation coefficients of some dilute solutions at 662 keV

RADIATION CHEMISTRY

Glenn A. Glowa and Stephen P. Mezyk — 127 The radiation chemistry of iodophenols

Chang-Yuan Lu, Si-De Yao, Wei-Zhen Lin, Wen-Feng Wang, Nian-Yun Lin, Yong-Peng Tong and Ting-Weng Rong — 137 Studies on the fullerol of C_{60} in aqueous solution with laser photolysis and pulse radiolysis

Mahnaz Chaychian, Mohamad Al-Sheikhly, Joseph Silverman and William L. McLaughlin — 145 The mechanisms of removal of heavy metals from water by ionizing radiation

Chang Chen, Yongke He and Jilan Wu — 151 Selecting ethanol as a model organic solvent in radiation chemistry—3. Radiolysis of glycyrrhetinic acid (GL)-ethanol system and structure modification of GL by γ radiation method

J. F. Chen, S. D. Yao, G. S. Chu, Z. C. Zhang and M. W. Zhang — 161 Pulse radiolysis studies of vitaminK_1 in an aqueous–organic mixed solvent

S. Kapoor and C. Gopinathan — 165 Reduction and aggregation of silver, copper and cadmium ions in aqueous solutions of gelatin and carboxymethyl cellulose

R. Joshi, S. Adhikari, C. Gopinathan and P. O'Neill — 171 Reduction reactions of bovine serum albumin and lysozyme by CO_2^- radical in polyvinyl alcohol solution: a pulse radiolysis study

RADIATION PROCESSING

D. Binh and H. T. Huy — 177 The effect of concentration of acrylic acid, dose rates and temperature on preirradiated graft of natural rubber-based thermoplastic elastomer

Hassan A. Al-Kahtani, Hamza M. Abu-Tarboush, Yousif N. Al-Dryhim, Mohamed A. Ahmed, Adnan S. Bajaber, El-Shami E. Adam and Mohamed A. El-Mojaddidi — 181 Irradiation of dates: insect disinfestation, microbial and chemical assessments, and use of thermoluminescence technique

Number 3

John H. Hubbell — 189 Introduction

Martin J. Berger — 191 Applicability of the condensed-random-walk Monte Carlo method at low energies in high-*Z* materials

Tatsuo Tabata, Pedro Andreo and Kunihiko Shinoda — 205 An algorithm for depth–dose curves of electrons fitted to Monte Carlo data

Bruce Faddegon, Judith Balogh, Robert Mackenzie and Daryl Scora — 217 Clinical considerations of Monte Carlo for electron radiotherapy treatment planning

J. J. DeMarco, T. D. Solberg, I. Chetty and J. B. Smathers — 229 Efficient sampling algorithms for Monte Carlo based treatment planning

José M. Fernández-Varea — 235 Monte Carlo simulation of the inelastic scattering of electrons and positrons using optical-data models

Francesc Salvat — 247 Simulation of electron multiple elastic scattering

Lech Papiez and **Vladimir Tulovsky**	257	Diffusion equations and hard collisions in multiple scattering of charged particles
Michael Ringor and **Lech Papiez**	263	Inverse planning and optimization: a comparison of solutions
P. J. Keall, P. W. Hoban and **M. P. West**	275	Super-Monte Carlo: A photon/electron dose calculation algorithm for radiotherapy
Y. Namito, H. Hirayama and **S. Ban**	283	Improvements of low-energy photon transport in EGS4
George A. Sandison and **Lech S. Papiez**	295	The concept of mass angular scattering power and its relation to the diffusion constant
Zhengming Luo	305	An overview of the bipartition model for charged particle transport
Chang-Ming Ma	329	Characterization of computer simulated radiotherapy beams for Monte-Carlo treatment planning
Abstracts	345
